LA TEORÍA DEL APRENDIZAJE DE VIGOTSKY.

La teoría de Vygotsky ha sido construida sobre la premisa de que el desarrollo intelectual del niño no puede comprenderse sin una referencia al mundo social en el que el ser humano está inmerso. El desarrollo debe ser explicado no sólo como algo que tiene lugar apoyado socialmente, mediante la interacción con los otros, sino también como algo que implica el desarrollo de una capacidad que se relaciona con instrumentos que mediatizan la actividad intelectual.

Vygotsky considera el contexto sociocultural como aquello que llega a ser accesible para el individuo a través de la interacción social con otros miembros de la sociedad, que conocen mejor las destrezas e instrumentos intelectuales, y afirma que, la interacción del niño con miembros más competentes de su grupo social es una característica esencial del desarrollo cognitivo.

Este autor concedió gran importancia a la idea de que los niños desempeñan un papel activo en su propio desarrollo. El interés fundamental de Vygotsky se centra en comprender los procesos mentales superiores para ampliar el pensamiento más allá del nivel "natural".

Preguntas:

Que propone la Teoría de Vigotski?

Afirma que, la interacción del niño con miembros más competentes de su grupo social es una característica esencial del desarrollo cognitivo.(B)

Vigotski descubre los estadios de desarrollo cognitivo desde la infancia a la adolescencia.

Vigotsky propone una psicología basada en la actividad.

Todas son correctas
